

Valkieser Capital Images, The Netherlands, Chooses BrightDrive for Real-Time Media Sharing

Reno, NV, USA, March 15, 2007, www.4bright.com: Bright Systems, Inc., developer of file server and media sharing technology for the digital film industry, has announced that Valkieser Capital Images, one of Amsterdam's leading visual effects companies, has installed a BrightDrive media sharing system for its state-of-the-art post-production facilities. The new system allows Valkieser to streamline the efficiency of its effects and finishing workflows, maximizing throughout for commercials, episodics, and feature films.

Valkieser's BrightDrive provides two streams of real-time 2k video enabling operators to share media between two Digital Vision Film Masters, a Film Cutter and a Quantel iQ. BrightDrive also provides Valkieser with near-line storage for commercials.

"BrightDrive allows us to significantly speed up the flow of work between the various post-production processes," said Antonie Colbers, head of engineering, Valkieser Capital Images. "It is a proven system and provides excellent reliability."

BrightDrive delivers digital media at speeds greater than real-time between all post-production and DI workflows irrespective of the mix of operating systems in use. Concurrent users are able to work on the same digital files simultaneously without the need to copy files from one workstation to another. Real-time capture and playback is provided and users can master and deliver at any format.

About Valkieser Capital Images

Valkieser Capital Images is one of Amsterdam's leading visual effects companies. We have provided visual effects to numerous commercials, episodics, telefilms and feature films. With Airport Schiphol and the city center just round the corner we are very well connected. Telecine is in our blood since the company was founded back in 1995. With the Ursa Y-Front and ITK Millennium equipped with 2K and HD scans, Valkieser Capital Images became unique in offering the full range of film transfers and color correction; da Vinci Renaissance, da Vinci 2K and now we are proud to be the first Dutch facility to offer the Nucoda Digital Film Theatre. Our VFX artists have the industry's most powerful and creative tools at their disposal and are on hand to help with all stages of the production process, from conceptual work to shoot supervision and guiding the project through the VFX department into completion. Our CG team comprises experts and connections from all over the world to ensure we always keep ourselves at the forefront of new developments. Our dedicated CG department keeps on with their research and software development. Within each department we have a very broad base of experience on different projects. We can also help you visualize your ideas by using our in-house storyboarding talents. Our producers strive

to provide you with the best approach on post production and offer you unrivaled dedication and commitment to create stunning creative digital imagery. www.valkieser.com

About Bright Systems

Bright Systems was founded in 1999 to design and develop advanced infrastructure systems for data-intensive environments. Based in Reno, Nevada, a centre associated with important milestones in the development of video disk recording, Bright Systems provides a range of extremely high-performance file servers capable of record/playback of real-time uncompressed video and data streams. With its unique expertise in advanced engineering and facility integration/workflow, Bright Systems is able to deliver a significant competitive edge to the post production industry. www.4bright.com
